

THE BRADFORD MEMORY CARE

At The Bradford Memory Care of Lake Houston, we are committed to the health and well-being of our residents, visitors and staff. We follow all Centers for Disease Control prevention guidelines, as well as state and local health department recommendations to mitigate the potential for COVID-19 within our facility. We provide routine and enhanced disinfecting and deep cleaning of all campus areas.

The Bradford Memory Care at Lake Houston is a brand new memory care campus. We have had limited traffic in the facility during the construction phase, but for those who do need to enter, they are screened using stringent recommended practices. In addition, as we begin our phased grand opening, we will continue to provide up to date COVID-19 prevention training and education to all residents, visitors and staff members.
